## BIOGRAPHY

Percussive and rhythmic grooves are what defines the unique sound of Michael Klein.

Born in Frankfurt, the former techno capital of Germany, raised by the sounds of Cocoon and Robert Johnson, Michael quickly found his passion for gradually teasing and heavy grooves. After the club scene started falling apart in Germany's financial capital Frankfurt, Michael took the journey up to Berlin where he reinvented his sound driven by the strong influences of Berlin and his residency at the legendary underground club Stattbad. His releases reflect a wide range of sound from rawstraightforward techno over groovy dubby sounds up to experimental and complex journeys through noises. Finding the "right" sound for the "right" moment is what makes Michael's production quality so multifaceted. His productions are recognised and supported by artists like Pan-Pot, Dubfire, Laurent Garnier, Chris Liebing, Speedy J, Danny Tenaglia, Drumcell, Carlo Lio and many more.

Michael is known for energetic and hypnotising sets that combine strong programming and mixing skills. His powerful manipulative mixing style sets him apart as an artist and a DJ creating something unique for the every moment with the "right" sound that puts the crowd into euphoria and sweat.

The last 2 years have been strong for Michael where he played outstanding shows like Hyte Amsterdam, The Hydra London, Boiler Room Berlin, Amsterdame Dance Event, Krysha Mira Moscow, Labyrinth Club Hasselt, Labyrinth Open Croatia, Smolna Warsaw, Watergate Berlin, Westerunie Amsterdam and many more.

In the beginning of 2017 Michael launched his own label called BLK DRP which had a very successful launch. Artists like Pan-Pot, Amelie Lens, Eduardo de la Calle, TWR72 and Raiz have provided remixes of Michael's originals for the label so far.

Not only his music makes Michael stand out as an artist. In mid 2015 Michael started his conceptual A/V project called Drawings which is based on a three dimensional LED construction driven by noise and soundscapes. We can expect to see and hear more of his projects soon.
